

SEXTS

Sexy texts, images,
videos, DIY porn ...

Not everyone sexts
but people talk
about it a lot

Most sexts happen
without problems

Just like all sex, it
can be good to do
if there is trust,
safety and consent

You can have sex if
you're apart from
each other

You can talk about
what turns you on

It can feel good to
have someone
admire your hot pic

YOU MIGHT BE BREAKING THE LAW

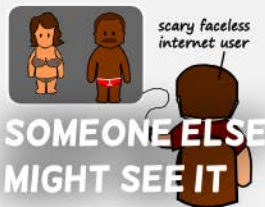

IF YOU ARE UNDER 18

Any sexy image of
someone <18 is
illegal. Even if you
take a pic of you

It's illegal to have it
on your phone or to
share it

If someone shares
a pic without your
consent you *can*
tell the Police

It's normally the
person that share
the pic without
consent that gets
into trouble.

If your phone gets
nicked, for example

Your partner might
be a total **** and
share the pic if you
break up

It can be hard to get
pics deleted or taken
down from websites

Sadly sometimes
people use 'sexts' to
harass/bully people

They are in the
wrong, but it can be
hard to deal with at
school/college

SAFER SEXTS

Would you like to see
my ****
Yes please, I promise not to
share it.
If you did I'd **** you in the
**** + call the Police.
scared face

Ask before you send
(asking is hot)

If someone says no,
respect that

Set your own limits
about how sexy/
naked you get

Do you understand
the legal risks?

Do you trust each
other not to share it
even if you break up?

Limit risk by keeping
face out of shot or
keeping your pics
on *your* phone

FOUND THIS USEFUL? SEXT IT!
